### Description of Summer Wonder Camps

#### How Do They Do That? June 8 – 10

Have you ever wondered “How does that work?” or “How did they do that?” If so this is the camp for you. Campers will get to explore the way things work in the world around us. Through special demonstrations and hand-on activities students will learn the mysteries behind things like slime and marshmallows.

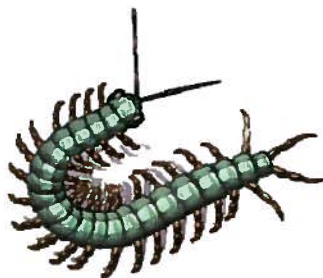

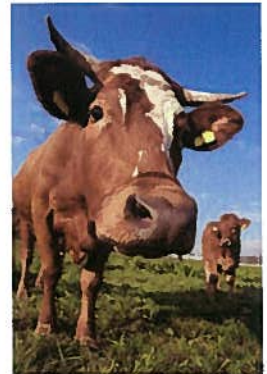

#### Art is Science June 15-17

Campers will experience life as an artist as they create their own art portfolio. The art of science will be explored through hands-on “studio” activities using a variety of different mediums. Campers will also venture outdoors to find art in nature.

#### Animals on the Loose June 22 - 24

Campers will experience animal life as they learn about how and where animals live. Caring for animals (both domestic and wild) will be explored along with discussions about conservation. Campers will get to test their knowledge with hands-on activity centers at the College of Veterinary Medicine.

#### Insects Rule the World June 29 – July 1

Experience the beauty and fascination of insects and their relatives on campus at the Insect Zoo and Arboretum! Learn about their importance to our daily lives and even our existence on the planet through hands-on activities! Discover how to make an insect collection and even earn your insect Jr. Master Gardeners' pin!
