Overview

The SLIST Entry List Model class returns the list stored in a SLIST catalog entry.

Ancestors:
- sashelp.fsp.Object.class
- sashelp.fsp.Selmdl.class

Class:
- sashelp.classes.Slistentrylist_c.class

Using the SLIST Entry List Model

You can use the SLIST Entry List Model class in conjunction with a viewer control for model/view communication. When you drop a model on a control in a frame, or you set the control's model attribute to the name of the instantiated model object, the items attribute of the view is automatically set to the items attribute of the model when you specify the entryName attribute on the model.

For example, add a list box control and an SLIST entry list model to a frame, then set listbox1.model to slistentrylist1. To display the SCL list contained in the SLIST entry in the listbox, specify a value for slistentrylist1.entryName.

You can also use the SLIST entry list model in an SCL program to retrieve an SCL list from an SLIST entry. Once you specify a valid SLIST entry name for the object's entryName attribute, simply query the items attribute to get the list.

Attributes

Public attributes specified for the SLIST Entry List Model class are described here. See sashelp.fsp.Selmdl.class for inherited attributes.
Dictionary

description

Returns the short description for the object
Type: Character
Valid Values:

entryName

Returns or sets the SLIST entry name used to fill the items list
Type: Character
Valid Values:
Editor: sashelp.fsp.slistdlg.scl

Methods

Methods specified for the SLIST Entry List Model class are described here. See sashelp.fsp.Selmdl.class for inherited methods.

_bterm

Terminates an object at design time

Syntax

objectName_bterm( );
_init

Initializes an object

Syntax

objectName_init( );

objectName_init( numArg );

_term

Deletes an object

Syntax

objectName_term( );

Events

Events specified for the SLIST Entry List Model class are described here. See sashelp.fsp.Selmdl.class for inherited events.

entryName changed

Occurs when the entryName attribute is changed
